## The Switch Difference

- Made in America.
- Exact fit in accordance with the original OEM part to ensure performance in filtration efficiency and dirt holding.
- Materials duplicate or exceed the specifications of the original OEM part.
- Elements are inspected and packaged to the highest cleanliness standards prior to shipment.
- Switch Filtration does not just build "look-alike" elements; we build duplicate OEM parts from the inside out to make them "perform-alike."

## SOME FREQUENTLY ASKED QUESTIONS

### WHY SWITCH?

Over the past 27 years, the founder of Switch Filtration built a reputation for delivering application engineering excellence and exceptional customer service in his position as president of Thermal & Mechanical Equipment Company (TMEC), a leading distributor supplying OEM products to the high speed rotating equipment industry.

His experience at TMEC, distributing high quality products and collecting best practices, led him to the decision to form a new company, one that specializes in manufacturing OEM replacement filter elements for the same high speed rotating equipment industry. Switch Filtration was born.

Today Switch Filtration has created a culture that cares about providing a superior customer experience while striving to exceed current industry standards. In manufacturing OEM replacement filter elements with ISO certified materials, it ensures premier products for its high speed rotating equipment clientele. The direct result is a significant improvement in both the quality and price of these filter elements for our customers.

### DOES SWITCH FILTRATION MANUFACTURE OEM REPLACEMENT FILTER ELEMENTS?

**YES.** Switch Filtration builds replacement filter elements for use in Hydac, John Crane/Indufil® and Pall Corporation filters, among others, while meeting the highest known quality standards for fit, form, function and efficiency.\*

### ARE SWITCH FILTRATION OEM REPLACEMENT FILTER ELEMENTS "MADE IN THE USA"?

**YES.** We searched the world for the best place to control the quality of our manufacturing, and we're proud to say that we found it right here in the U.S. We believe in our U.S. workforce's ability to engineer, design and manufacture products that exceed present quality standards. We do more than say "Made in America" at Switch Filtration: we say "Made Better in America!"

### IS THERE AN ADVANTAGE TO BUYING SWITCH FILTRATION'S OEM REPLACEMENT FILTER ELEMENTS INSTEAD OF THOSE OF OTHER MANUFACTURERS?

**YES.** Switch Filtration engineers have decades of experience in the application engineering of the equipment in which our filter elements are used.

Switch Filtration does more than duplicate size and fit. Switch Filtration duplicates performance. Switch Filtration does much more than manufacture "look-alike" filter elements.

### ARE SWITCH FILTRATION REPLACEMENT FILTER ELEMENTS BEING USED IN THE HIGH SPEED ROTATING EQUIPMENT INDUSTRY WORLDWIDE TODAY?

**YES.** Switch Filtration is currently shipping OEM replacement filter elements to high profile end users, service companies and packagers across the globe.

### WILL SWITCH FILTRATION OEM REPLACEMENT FILTER ELEMENTS COST MORE?

**NO.** Switch Filtration controls the cost at every step in the manufacturing process – from design, to testing, to fabrication and fulfillment – and by manufacturing in the United States, we eliminate the currency exchange rate and U.S. duty increases that are common with some of the top OEM manufacturers that have plants outside of the United States. By doing so, we are able to bring our customers exceptional quality and pricing on all of our OEM replacement filter elements.

### WILL I BE ABLE TO PURCHASE SWITCH FILTRATION FILTER ELEMENTS WORLDWIDE?

**YES.** Switch Filtration is committed to supplying our filter elements to customers worldwide, either through our U.S. stocking distributor – TMEC Process Filtration LLC, a division of Thermal & Mechanical Equipment Company (TMEC), Houston, Texas – or through one of our worldwide distributors. Contact us for more information about how to become a client or distributor.

### ARE SWITCH FILTRATION FILTER ELEMENTS GUARANTEED?

**YES.** Switch Filtration guarantees the fit and performance of all its replacement filter elements. If you are not satisfied with the product that we build, return the elements unused within 30 days of purchase in the original container and packaging, and we will credit your account or refund your money. See further details in "Our Guarantee" below.

## \*OUR GUARANTEE

Switch Filtration guarantees much more than just a "look-alike" replacement filter element.

Our guarantee starts with the fit of the element into the filter housing both in terms of length and diameter, and very critically in terms of fit to the cartridge adaptor. After fit comes performance.

All Switch Filtration replacement filter elements are guaranteed to meet the filtration efficiency and overall performance of the original equipment manufacturer's elements. We guarantee that Switch products will meet the material specifications of construction as originally

supplied by the OEM.

To guarantee filtration efficiencies and dirt holding capabilities, we purchase filtration media only from the industry manufacturing leaders in glass fiber, stainless steel fiber felt and woven wire cloths technology. We then craft this media through the best manufacturing practices into the finest filter elements available in the market today.

If you are not satisfied with the product that we build, return the elements unused within 30 days of purchase in the original container and packaging, and we will credit your account or refund your money.
